

## Wednesday Challenge Form

Group Members: Kirk Tony

Problem Statement: move three golf balls from one bag to another without putting your hand in the bag.

Approach: We were judging and we forgot to tell the teams how high the bag was so we lowered the bag til it was basically your contraption could either pick up the balls or not.

Solution: The veterans won(surprise surprise) with the same design that has won for the almost every year in a row since the first one was made.

Lessons Learned: Tell the teams every rule and assume nothing.
