

Date:2/22

Wednesday Challenge Form

Group Members: me and demitri

Problem Statement: Sketch up and cut out a cardboard A as accurate as possible

Approach: I helped Dmitri create the A and made sure it was at the right scale. Dr Neat didn't want me to cut out the A so I had Dmitri do it. I drew out the A for him to follow the guidelines

Solution: We came in third place

Lessons Learned: Patience and accuracy pay off in the end
