

Video/Speaker Observation Form

Video Title/Speaker: Mr. Wilton

Subject summary: Mr. Wilton talked about his job and described his latest project. The project was a gyroscopic camera that could take pictures and record videos of surgery for educational purposes. The problem was that the operation room had a very small space to fit the machine. Mr. Wilton had to create a camera that could stay balanced and stable but move on all axis.

Coollest thing you learned: Mr. Wilton was able to create the machine to follow all of the doctors requests and requirements.

What you disliked: Mr. Wilton didn't talk about what he did and what his partners did.
