

Wednesday Challenge Form

Group Members: Michael P, Alex P

Problem Statement: Alex will sketch up a capital E. Michael will then create a model of someone else's sketch up to scale.

Approach: Alex made an e with strips on it. And I used his pen to make exact measurements.

Solution: We came in second place by 0.0625 inches off .

Lessons Learned: When you are making sketch up make sure the unit is correct for what you are trying to make.
